Members

HESAM Université federates **15 french and international Higher Education institutions** forming educational, research and corporate networks (10 members and 5 associate/affiliate members).

le cnam With a unique position in the French educational landscape, the Conservatoire National des Arts et Métiers (Cnam) is **also among the world's top higher education establishments** dedicated to lifelong learning and research.

Arts et Métiers is **one of France's oldest and best engineering schools** specialising in mechanical, industrial and energy engineering.

CESI is **a prestigious French engineering school** turned towards innovation and technologies, around the Industry of the Future, Building Industry and Smart City.

École Boulle is **one of the leaders for the teaching of craftsmanship, applied arts and design in France.**

École Estienne was founded with the goal of **preserving the artistic tradition of bookmakers.** Since 1889, École Estienne has seen renowned artists in its halls.

École Nationale Supérieure d'Architecture de Paris-La Villette (ENSAPLV) is **the biggest accredited architecture school in France** with a strong research activity.

ENSCI-Les Ateliers is **the top establishment of higher education and research dedicated to industrial design and industrial creation.**

Institut Français de la Mode is **the world leader establishment that offers a complete range of programs in fashion management and creation.**

ENSAAMA offers to its students a wide top level range of programmes **in design and contemporary crafts.**

École Duperré offers unique artistic and technical training programmes and trains in the professions of **creative, fashion, textile, space and graphic design, textile art such as embroidery, weaving and tapestry, and also in ceramics.**

Founded in 1974, Paris School of Business offers various programmes. Its pedagogy aims to meet the expectations of companies looking for talent with appropriate managerial competencies and attitudes, as well as technical skills and 'know-how'.

France Clusters is **the French network of clusters in the service of hubs** for accelerating small to medium companies and their partners (national, regional, local, economic, scientific and financial partners).

Compagnons du Devoir et du Tour de France is **a prestigious establishment of training and apprenticeship of several trades following the traditions of companionship.**

FNEP is a **think tank dedicated to strengthen connections between companies and administration.**

The CFJ (Centre de Formation des Journalistes) is **one the best French schools for journalists.**

Interdisciplinary vision of education

HESAM 2030

« Construisons nos Métiers! »

In a fast changing world, HESAM 2030 « Let's build our skills! » creates and deploys throughout the national territory new degrees offered to all, with a priority given to vocational baccalaureate holders, adaptable to everyone, everywhere and throughout life with a new pedagogical method. *This program is funded by the 3rd Future Investment Programme (PIA 3).*

Individualized Curriculum in Technology, Creation, Management and Humanities - Bac+1 degree
Bachelor in Technology, Creation, Management and Humanities
- Bachelor'HESAM Bac+3 degree

CENTRE MICHEL SERRES

The Centre Michel Serres provides training for students, from different backgrounds, by making them engage in a joint research project during 6 months, combining interdisciplinary and professional experience with concrete use sponsored by partner companies and institutions.

The Michel Serres Semester
The Master's Degree in Innovation, Business & Society - Centre Michel Serres
The Michel Serres Post-Master's Degree

HESAM ENTREPRENDRE

PÉPITE HESAM Entreprendre helps the students to develop creativity and entrepreneurship spirit. Students with the project to create or take over a company, have the opportunity to obtain the national status of student-entrepreneur, and to register to the Diplôme Etudiant Entrepreneur (D2E).

The Student Entrepreneur Degree (D2E)

With its digital hub, HESAM Université :

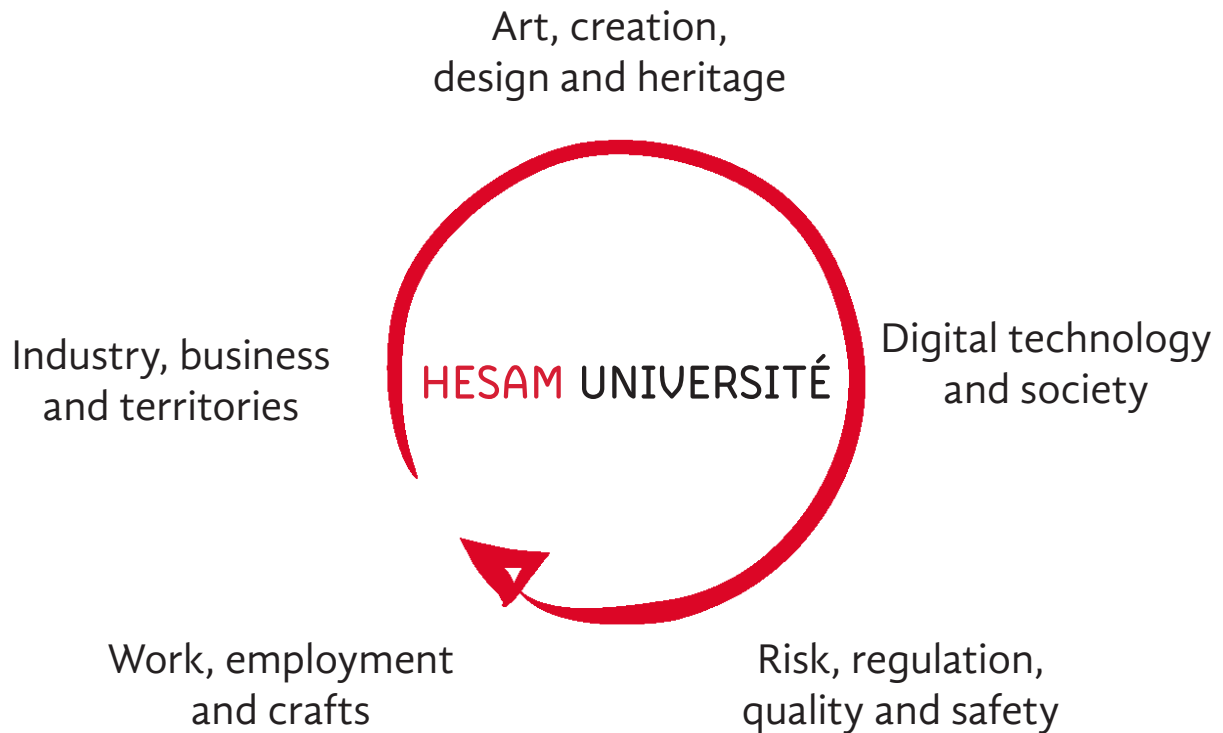

- creates digital resources and tools for teachers and students with orientation Mooc and self-positioning tools on soft skills and information skills;
- trains teachers to the production of Mooc;
- watches the innovative pedagogical uses and practices of the community for students and teachers.

Research excellence

HESAM Université offers real connections between education and research by building shared programmes and promoting collaborative research.

5 transdisciplinary fields answering societal challenges

PhD

Since January 2019, HESAM Université has been defining & implementing PhD studies and awarding PhD degrees within the framework of its two graduate schools: «Sciences et Métiers de l'Ingénieur» and «Abbé-Grégoire».

The Graduate School, which fully adheres to the mission of the PhD programs, has the mission of contributing to the development and implementation of HESAM Université's policy regarding PhD studies and to coordinate the issuing of the HESAM Université PhD.

Post-Master research in architecture

The Post-Master research in architecture, in cooperation with ENSAPLV, provides an introduction to research, a first long-term experience in a laboratory and a cross scientific background which can be continued with a PhD.

1,000 PhD Students for the Territories

By sending PhD students to local councils and non-profit organizations for 3 years, in the entire time of their PhD studies, HESAM Université aims at empowering local authorities, while giving PhD candidates the opportunity to do long-term research for a local administration. « 1,000 PhD Students for the Territories » won an award from the French Ministry of Research for the employment of humanities graduates.

1000 POUR LES
TERRITOIRES
DOCTORANTS

Matrice Memory Program

Matrice Memory Program studies the relationship between individual and collective memory, between the psychic and the social. Its ambition is to produce a technological platform that mobilizes the joint efforts of 24 partners.

13-Novembre Research Program

13-Novembre is a transdisciplinary and groundbreaking research program on traumatic memories. Through a long series of interviews over 10 years with 1000 people (victims or witnesses of the Paris bombings), it aims to study the mechanisms of memory.

European and international university

Cooperation with University of London

HESAM Université has broadened its international cooperation strategy by signing a partnership agreement on 13 June 2019 with the University of London and its Institute in Paris. These federal universities are both composed of brilliant institutions with recognized academic expertise. The partnership includes student exchanges, collaborative research projects, and the participation of academics in workshops and conferences.

**UNIVERSITY
OF LONDON**

HESAM Université is involved in the European and International development of its members, its projects and its own degrees.

HESAM Université supports its institutions in **developing their international strategy and in improving their worldwide visibility** to increase their attractiveness through :

- **Community programs:** Erasmus +, Horizon Europe, Interreg;
- **Interactions and exchanges of best practices;**
- **Awareness-raising and support sessions for researchers leading projects;**
- **Leading projects on behalf of its members.**

HESAM Université manages the Europe Research network to **encourage the international development of research in organising projects of excellence and mobility:** ERC, Marie-Sklodowska Curie grants.

HESAM Université also coordinates **the response to European and international calls of proposals** for the benefit of its members (e.g. International Credit Mobility).

Color Circle

Color Circle is an Interreg Europe project coordinated by HESAM Université. Dedicated to around circular economy projects and innovative cooperation between local authorities and research actors.

It brings together five European regions:

- Burgundy Franche Comté (Regional Council),
- Centru Region in Romania (Regional Development Agency Centru),
- Central Bohemia (Central Bohemian Innovation Centre),
- Friesland (Van Hall Larenstein University of Applied Sciences),
- Granada County (Granada County Council).
